

VEHICLES

Stay on track using a single system.

No matter the size of your fleet, our intuitive, easy-to-use vehicle and fleet management solutions allow you to easily locate, track and manage all of your vehicles and equipment using a single web-based software platform. Geoforce keeps it simple and cost-effective by delivering only the features you need most.

By managing your vehicles with Geoforce, you'll have:

- On-demand, near real-time knowledge of where your vehicles are currently and where they have been
- Enterprise-grade web services and data integration that work with your existing business systems, allowing for seamless reporting and decision making
- Dashboard features offering near real-time operating data and metrics that are immediately actionable
- Automatically generated alerts based on vehicle movement, speed and exit or enter events
- User-defined reports on questions such as miles driven by state
- The power to manage your vehicles, equipment and any other assets in the same user-friendly, integrated system
- The ability to manage vehicle maintenance tasks and documents online in the same system
- Highway traffic alerts integrated into the Geoforce mapping system
- The ability to share location and other data or reports with partners and customers through the proprietary Asset Share system

Improves Operational Efficiency

Geoforce users significantly improve their dispatch operations and response times. Arrival times and delays are estimated far more accurately.

Enhances Customer Service

With detailed operational knowledge at their fingertips, Geoforce users can offer their customers improved service. Delivery times narrow and response times improve.

In control. On demand.

“Knowing where our drivers are at all times allows us to efficiently dispatch our trucks and verify where they’ve been for billing or safety issues. It’s critical to our business. Geoforce helps us accomplish this without having to hire a team of people to monitor the system.”

Tim Underwood,
INFINITY OILFIELD SERVICES

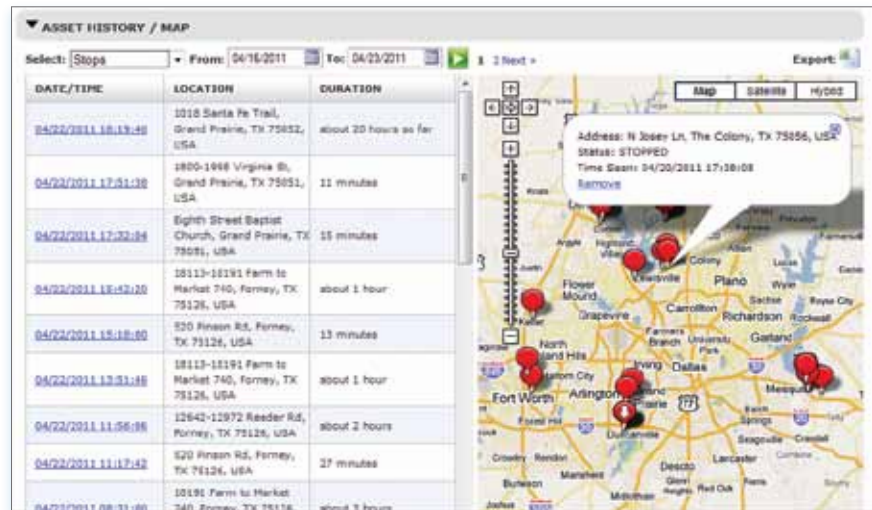

Common Applications:

- Service Vehicles
- Fleet Vehicles
- Hot Shots/Pick-ups
- Water Trucks
- Pumping Trucks
- Wireline Trucks
- Vacuum Trucks

Better Driver Accountability

Intelligence such as Exit/Enter Reports, Stop Reports and Breadcrumbs give you visibility to what’s happening on the road. Unauthorized usage is eliminated. Accurate start and stop times are automatically recorded.

Reduces Risk and Exposure

Comply with regulations and reduce risk in your operations with the assurance that your vehicles are where they are supposed to be, maintenance is performed in a timely manner, and speeding and other hazardous activities are minimized.

Lowers Fuel Costs

Geoforce users significantly reduce their fuel bills through better knowledge of their fleet’s activity, driving patterns and idle time reports.

Reduces Communication Costs

By having near real-time access to the location of your vehicles, costly and time-consuming phone communications between your dispatchers and drivers is significantly reduced.

Geoforce puts you back in control of the road.

Geoforce gives you control over your enterprise assets and the assurance they are being efficiently tracked and managed. Our intuitive, reliable and scalable technology provides on-demand access to unique operational insight.
