

Because field operations don't have to be chaotic

GLOBAL
TRACEABILITY
— FOR FIELD EQUIPMENT —
AND VEHICLES

STATEMENT OF CAPABILITIES

Geoforce was founded in 2007 with the simple belief that the chaos and pain of field operations be alleviated with technology. Since 2007, our mission has been to build the largest global network of connected field assets to provide operations intelligence to companies involved in field operations around the world.

Combining a cloud-based software platform with rugged GPS tracking devices and global satellite and cellular networks, Geoforce's Track and Trace solutions include efficient asset location and retrieval, rental invoice auditing, service delivery verification, inspection compliance, equipment maintenance alerts, and a host of others.

Core Competency – Rapid Response Asset Tracking

Geoforce's mission is to build the largest global network of connected field equipment. One focus for Geoforce is providing in-transit visibility and operational intelligence to the world's most demanding industries - as well as governments, militaries and other organizations - tasked with Rapid Response action. Geoforce designs and develops the world's most rugged, reliable and longest-lasting battery-powered tracking devices in the world. Geoforce provides visibility and with an end-to-end solution that combines hardware and software for all types of field equipment/supplies and logistics tracking.

- Track assets reliably, everywhere – indoors and outdoors
- Manage ongoing field operations and subcontractors
- Eliminate hoarding of valuable assets during crises periods
- Perform near-real-time inventory checks
- Gain near-real-time situational awareness
- Recover lost or misplaced equipment

Total Asset Visibility with Rugged, Versatile Devices

AT1 Indoor/Outdoor Cellular Asset Tracker provides indoor proximity reporting without readers or other infrastructure. It is the ideal device for high value shipments and inventory which must be visible both outdoors (via GPS) and indoors.

GTO Global Satellite Asset Tracker is the world's smallest industrial grade satellite tracking device – ideal for high value shipments used in areas without consistent cell coverage or which cross borders.

GT1 Global Asset Tracker is the world's most rugged tracking device, among the smallest and longest lasting, and most Intrinsically Safe (IECEX/ATEX Zone-0), ideal for tracking assets in explosive environments.

Geoforce Gateway is a Bluetooth Low Energy (BLE) reader, which provides indoor visibility for Geoforce's satellite devices.

GT2 Next Generation Transponder, is a satellite-based 2-way asset tracker, using solar and primary batteries for 10+ years of uninterrupted tracking. The GT2 is available through the (no recurring cost) Iridium EMSS program for government customers.

Situational Awareness: Past Performance

Geoforce has deployed 160,000+ satellite and cellular GPS tracking devices to both the private sector and governments around the world. Geoforce's solutions – combining hardware, software and field support/training - played an important role in Rapid Response services during crises ranging from the BP Oil Spill to Hurricane Maria. Geoforce is an existing partner for several FEMA suppliers – as well as US DoD and other defense contractors, helping to streamline procurement.

Cage Code 6KUW3

GEOFORCE RAPID RESPONSE SERVICES

Speed . . . a sense of urgency borne from experience

- Orders can be accepted 24 hours/day, 7 days/week – with immediate input into Geoforce’s logistics systems.
- Geoforce maintains healthy inventories of its off-the-shelf devices – and can deliver globally, sometimes as soon as next day when required.
- Once devices are on site, hundreds of assets or shipment pallets/containers can be tagged with Geoforce devices within a few a few hours.
- Installed devices immediately appear in Geoforce’s Track & Trace web/mobile software and/or deliver a data feed (using APIs) to deliver location data to other systems.

Simplicity . . . flexible terms + easy to install & operate

- Geoforce offers a variety of purchasing methods, including standing contract vehicles (such as GSA), as well as multiple partnerships and teaming agreements
- Flexible pricing options include “life of device” plans with zero recurring airtime costs. Pay once and that’s it.
- Slap & track installation can be done by any employee or contractor using common tools.
- No Training Needed: Designed with highest standards of reliability, fully sealed with 10+ years' service life.
- No end user maintenance required – no battery changes, no recharging, no downtime.

Accountability . . . visibility of location and chain of custody

- Geoforce provides accurate asset visibility for pinpointing the location and custody of crucial assets.
- Any authorized user with a smartphone, tablet or PC can login and immediately get visibility to location status of key assets
- Suppliers and organizations both have visibility via “share to” software feature, keeping all parties on the same page – and eliminating “he said/she said” situations.
- Hoarding assets due to loss of confidence is eliminated; infighting for assets is reduced.

Proven Results . . . a stellar history; multiple references

- 13 years of operational excellence marked by multiple product & supplier awards; deep referral base
- Existing global customer base of some of the world’s most demanding private and public sector customers
- Highest quality standards (ISO based) for design, manufacture and distribution, ensuring unmatched reliability.
