

TRACK & TRACE  
FOR

**POWERED  
EQUIPMENT**

Because field operations don't have to be chaotic.

**P**umps, generators and light towers are all mission-critical powered equipment used daily in the oilfield. To reduce operational costs for equipment in remote areas, Geoforce provides vital location, run time and maintenance reports.

## WHERE'S MY **EQUIPMENT**?

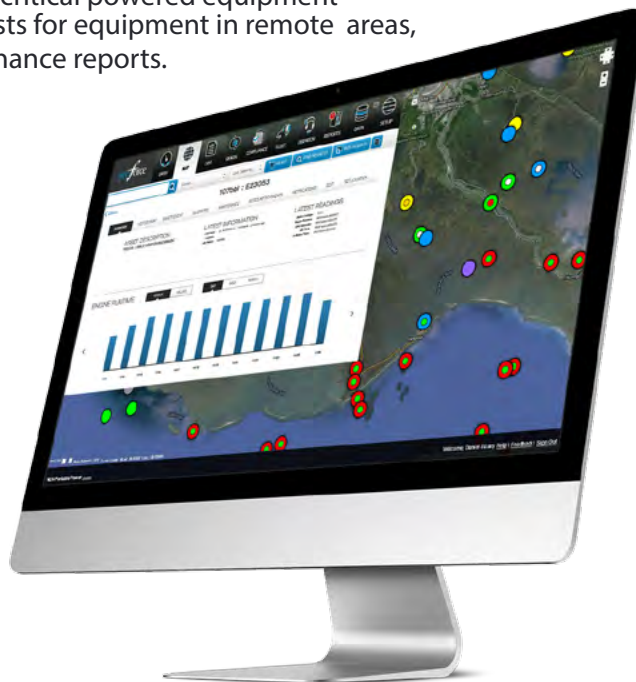

- Locate valuable equipment
- Improve response times
- Plan field operations

## WHERE'S MY **RISK**?

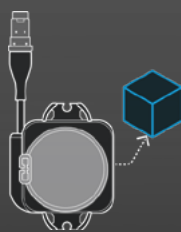

- Reduce downtime on jobs
- Ensure maintenance is current

## WHERE'S MY **PROFIT**?

- Turn equipment faster
- Increase asset utilization
- Cut capital expenses

## GEOFORCE IN ACTION

### INSTALL

Field assets that require tracking are identified and purpose-built devices are installed on each asset.

### TRANSMIT

GPS and data are transmitted via global satellite and cellular networks. Secure Tier 1 data centers receive, process and enrich the data, then feed applications.

### TRACK

Enriched asset data is viewed via the web and mobile devices, solving key operational challenges.
