

TRACK & TRACE FOR NON-POWERED EQUIPMENT

Because field operations don't have to be chaotic.

Simplify the management and billing of frac tanks, roll-offs, trailers and other container types. GeoForce's dynamic GPS tracking solution allows oilfield service, rental and operating companies to save time, labor and fuel costs.

WHERE'S MY **EQUIPMENT**?

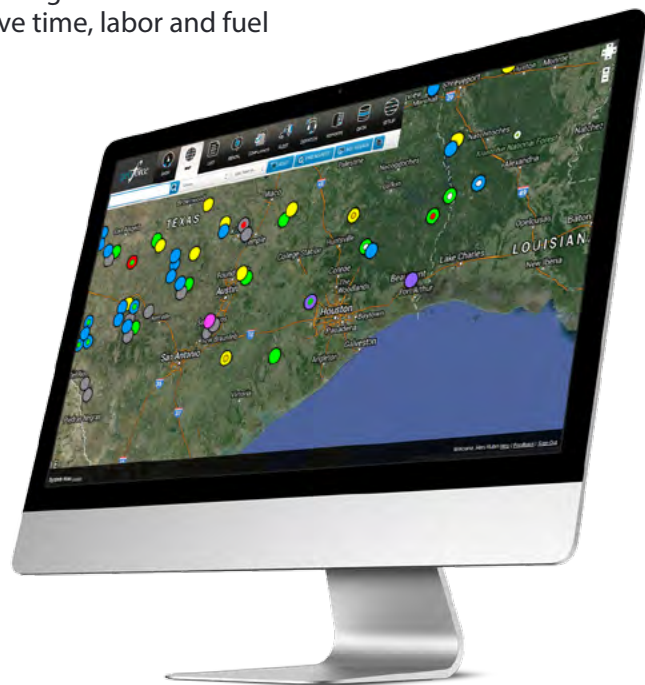

- Locate valuable equipment
- Improve response times
- Plan field operations

WHERE'S MY **PROFIT**?

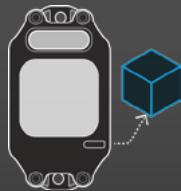

- Verify rental invoices
- Avoid billing disputes
- Minimize asset hoarding

WHERE'S MY **OPPORTUNITY**?

- Turn equipment faster
- Increase asset utilization

GEOFORCE IN ACTION

INSTALL

Field assets that require tracking are identified and purpose-built devices are installed on each asset.

TRANSMIT

GPS and data are transmitted via global satellite and cellular networks. Secure Tier 1 data centers receive, process and enrich the data, then feed applications.

TRACK

Enriched asset data is viewed via the web and mobile devices, solving key operational challenges.
