

Geoforce's industrial grade suite of GPS tracking devices can be utilized to track all types of rugged assets. Our connected platform gives you the asset intelligence you need to:

- **Monitor** assets anywhere
- **Share** visibility with your customers
- **Maximize** rental utilization
- **Manage** equipment maintenance
- **Track** rental status
- **Minimize** theft risk
- **Reduce** invoice discrepancies
- **Increase** rental revenue

## SEE EVERY MOVING ASSET

You've got work to do and deadlines that can't wait. But trailers wander, bins get forgotten, and tanks vanish when you need them most. That's time, money, and trust lost. The GT1c keeps your assets visible, so you know where everything is, avoid wasted trips, and keep jobs moving.

### Review our asset inventory list and see some of what you could be tracking:
