

Tiger Rentank do Brasil has the largest accredited portfolio of equipment for onshore and offshore logistics in Brazil.

GEOFORCE COLLABORATED WITH TIGER RENTANK DO BRAZIL TO REDUCE THE OPERATIONAL CYCLE AND INCREASE THE PERFORMANCE OF EACH PIECE OF EQUIPMENT

In addition to offering quality equipment, with complete focus on safety, the company continuously invests in excellence in the provision of special services, such as mixing and separating, storage, decontamination, leak tests, maintenance and remote technical assistance, providing a more complete experience for the customer and reducing total operating costs

Tiger counts on four branches in Brazil, the main one in Macaé, and has strategic differentials, such as its own modern hoisting equipment, fully automated tank cleaning systems and integrated management systems based on the main national and international quality, safety and environmental protection standards.

Challenges

With a diversified fleet of active equipment, Tiger Rentank was in need of a reliable solution to control the location and analysis of equipment life cycles, with the availability of real-time information. The company needed to assist its customers in managing the operational cycle of the tanks, from filling to return, with safety and reliability.

The key challenges were to reduce equipment operational cycles and have greater control of the performance of each piece of equipment.

HOW GEOFORCE HELPS

- Facilitate up to **97%** uptime
- More than **triple** technician productivity
- Reduce technician travel time by **15%**

Geoforce enables customers to manage critical equipment, avoid billing and payment disputes, and, in general, operate more efficiently.

“

Geoforce has added value to our equipment leasing by allowing better fleet management, optimization of assets, and enhanced customer experience.”

- **Daiane Machado**
Commercial Supervisor

About Geoforce

Geoforce was founded in 2007 with the simple belief that the chaos and pain of field operations could be alleviated with technology. Since then, our mission has been to provide our customers and partners with cutting-edge traceability solutions and insights.

Solution

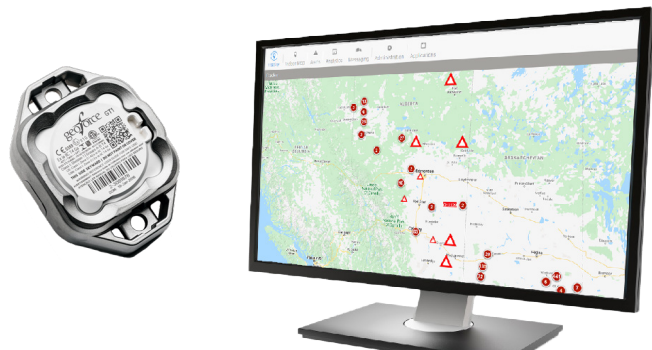

Geoforce was chosen because, in addition to meeting Tiger's safety requirements, the company offers the best online fleet management system. Geoforce provided full support in the implementation of the systems and devices. We also helped perform initial tests to determine the best placement of the device on the equipment, in order to achieve maximum performance, and update all compliance certificates in real time.

Tiger was also able to integrate Geoforce's information system with the safety and compliance certificates of each piece of equipment. Having everything in one single tool with easy access for reference and renewals provided an enormous benefit.

Tiger's ultimate goal is to track 100% of their fleet with Geoforce equipment - both tanks and CCUs - making the most of their assets and ensuring greater satisfaction for their customers.

Results

Reducing Asset Loss, Reducing the Operating Cycle and Increasing Equipment Availability - Goal successfully achieved!

Products Used: GT1

Equipment location, rental and safety inspection monitoring with Geoforce's versatile connected software platform.
