

INTEGRATED VIDEO TELEMATICS BUNDLE

Fully Accessible in the MyGeotab Platform

Back Your Fleet Telematics with the Industry-best Driver Safety Monitoring and Risk Detection Solution

Vehicle telematics is now table stakes. And driver safety scorecards don't always show you the complete picture. Forward thinking fleet management professionals are now supplementing their vehicle and driver monitoring capabilities with integrated dashcam technologies that provide proactive risk detection and additional context to standard engine data alerts.

GeoForce's all-inclusive telematics and video-enabled driver safety bundle includes:

- The GO9 - the most advanced vehicle telematics tracking device
- Dual-facing dashcams - providing complete driver safety monitoring and risk detection
- All-in-one tracking and reporting through the MyGeotab platform

3:1

**Average Return on
Investment in video-
enabled driver risk
detection technology**

\$200K

**Average cost of a
commercial vehicle
accident**

**Dashcam
technology is the
next step forward
in developing a

management
strategy.**

VEHICLE TELEMATICS IS JUST THE BEGINNING

GLOBAL LTE NETWORK CONNECTIVITY

- AT&T
- Verizon
- International Carriers

BENEFITS FOR YOUR BUSINESS

- Preventive detection of high-risk behaviors
- Reduced liability risk
- Insurance premium savings

We believe nothing should be lost.

Advanced Vehicle Tracking and Driver Safety Monitoring with the GO9

In partnership with Geotab, the industry leader in fleet management and vehicle tracking telematics, Geoforce offers the industry standard for advanced fleet tracking. The GO9 provides:

- Plug-and-play installation
- Vehicle location and engine data
- ELD for Hours of Service (HOS) reporting
- Driver safety monitoring and in-vehicle coaching

Integrated Dashcams for Expanded Risk Detection - in a Single Integrated Platform

Geoforce's dashcam technology is fully integrated with the MyGeotab platform, making it easy to implement for fleets of all sizes. Incorporating video into a complete telematics and driver safety strategy can help your organization proactively monitor driver behavior, reduce liability risk, and lower insurance costs. Our dashcam solution provides more features than any other device on the market, including:

- AI-enhanced driver behavior detection
- Proactive risk detection and alerting
- Dual-facing capability for validation of telematics reporting
- Driver safety dashboards and scorecards
- Continuous recording and live streaming options
- Customizable monitoring rules and workflows
- Trip-level and event-based video capture
